2025/10/27 07:25 1/1 RouteViews API etc

## **RouteViews API etc**

I've started collecting various bits and pieces about RouteViews, a project I've been helping NSRC with since mid-2022.

## **API**

The API is RouteViews preferred way for network operators and researchers to access the BGP data.

Here are the ways of accessing and using the API. All queries are made against https://api.routeviews.org

## **Prefix Query**

The command is https://api.routeviews.org/prefix/112.198.234.0/24
